The Government Dilemma

Gabe Brazil &
Ben Gohman

Prologue

Recently, the government has had a roller coaster of events. President Trump caused a huge amount of chaos recently. At the time of writing, this is the 35th day of the Government Shutdown. For those who need clarification, Donald Trump wanted to build a wall on the southern border. Because of this, he decided to make a donation site for the wall. As no one was donating, he shut down the government as a threat.

Costs

One of the main reasons the government is shut down is because Trump wants five billion for the wall which is about 7.0% of the total cost for the wall. That is excluding the price of maintenance and workers.

Trump's "Negotiations"

On January 9, 2019 he met with the Democrats for a meeting and he walked out, not having a deal for the Wall. When he had a meeting with Chuck Schumer, a Democratic Senator, and Nancy Pelosi, The House of Representatives speaker, who is also Democratic he tweeted "Just left a meeting with Chuck and Nancy, a total waste of time. I asked what is going to happen in 30 days if I quickly open things up, are you going to approve Border Security which includes a Wall or Steel Barrier? Nancy said, NO. I said bye-bye, nothing else works!" In other words, He basically just quit the meeting without negotiating anything. Furthermore, he blamed everything on the Democrats.

The Government Dilemma

Gabe Brazil & Ben Goihman

Effects on Government Workers

As the government is shut down, the officials and workers aren't getting paid. Here are some statistics from CBS News.

More than 420,000 federal employees would have to work without pay, according to a report from the Senate Appropriations Committee. An additional 380,000 would be furloughed – meaning sent home without pay – the committee estimates.

As you can see, 800,000 people aren't getting paid properly, thanks to the shutdown.

Views on Trump's Plans

This chart below shows how many people disapprove of Donald Trump's plans.

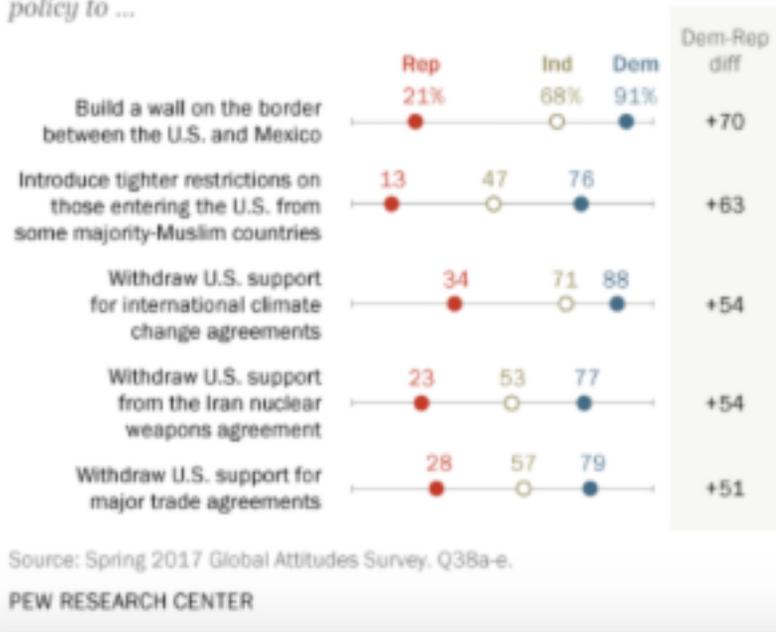

(from Pew Research Center)

Analysis: (important stuff)

- Mostly Democrats hate Trump's plan, but 23.8% of Republicans hate his plans.
- 60% don't like the wall.
- 40% want it constructed.
- 55% don't want harsher border security.
- 45% want harsher security.
- 36% don't want to make a change global warming.
- 64% do.

In the U.S., vast partisan differences in views of President Trump's policies

Disapprove of President Donald Trump's proposed policy to ...

In conclusion, Donald Trump really needs to start the government again, because as of now, people aren't getting paid, and people are suffering. All of the suffering is from one man. President Trump.

Future Decisions

As of now, my associates (me) and my captain authors (me) and my business advisors (me) don't know how the shutdown conundrum will end.

5 Games You Might Like

Sam Zwick-Lavinsky

FORTNITE

This popular battle royale game is quickly overtaking the world. This game is set on an island with 100 players that have jumped from a flying bus (reasons unknown). To win, you must be the last on the island by gathering guns and loot. Platforms: Mac, Windows, Android, iOS, Xbox One, PS4, and Nintendo Switch. Price: It's free.

APEX LEGENDS

Apex Legends is another battle royale game, sort of like Fortnite, but known as the Overwatch-y one, where each character you use will lead to a different outcome than others. Platforms: Windows, Xbox One, PS4. Price: It's free.

FIREWATCH

Firewatch is a game set in the Wyoming wilderness. You are a character named Henry who takes a job on fire patrol after escaping from his life back home. The only person you can talk to is your supervisor on the other end of the radio as you explore the wilderness below after you are drawn out of your watchtower by a strange occurrence. Platforms: Windows, Linux, Mac, PS4, Xbox One, and Nintendo Switch. Price: \$19.99.

SIMS 4

The Sims 4 is a popular simulation game in which you control people, called Sims, in an imaginary world. Sims basically do everything we do in life. The sleep, eat, go to work, socialize, watch tv, and -- ahem-- have children. You can control any number of Sims in a household and go out and do whatever you want in the world. You can make your Sims look like anything and everything you want them

to. Of course, there are expansion packs for unlocking new areas and getting access to more furniture. Platforms: Windows, Mac, PS4, and Xbox One. Price: \$39.99, an sale now for \$4.79.

PORTAL 2

Portal 2 is the sequel to 2007's game of the year, Portal. Throughout this adventure game, you must face off against a lethal AI called GLaDOS by solving mind-bending puzzles which deny the laws of physics. Platforms: Mac, Windows, Xbox 360, PS3, Linux. Price: \$9.99.

GAME
REVIEW

Game of the Year 2018 Analysis

Nirvan Mulchandani

Last year's Game of the Year was one of the best Game of the Year events ever! With Assassin's Creed Odyssey By Ubisoft Quebec / Ubisoft, Celeste by Matt Makes Games, God of War by Sony Santa Monica / SIE, Marvel's Spider-Man by Insomniac Games / SIE, Monster Hunter: World by Capcom, and Red Dead Redemption 2 by Rockstar Games competing for the award for the best game, it was pretty obvious that it was going to be epic considering that all of these games had great/good ratings since IGN gave Red Dead Redemption 2, God of War and Celeste 10/10 ratings, Monster Hunter: World 9.5/10, Assassins Creed Odyssey 9.2/10, and Spider-Man PS4 8.7/10 .

There were only two games picked to compete for the main award. Red Dead Redemption 2, a game that spent 8 years in development, and God of War. Red Dead Redemption 2 won 4 awards (which is a lot for one game, considering that games normally get 0-1) and God of War won 2 awards. And for you Fortnite fans, yes Fortnite won 2 awards, the best ongoing game award, and the best multiplayer game award.

If you are not a gamer, this face-off might not have been that important. But for a gamer, this was a battle between two really popular franchises. Red Dead Redemption (the first game in its series) was highly loved and the God of War series is looked at as a great series. Believe it or not, God of War won the best overall game. Many fans disagreed with this. They

CONTINUED ON NEXT PAGE...

Game of the Year 2018 Analysis

Nirvan Mulchandani

believed that Red Dead Redemption 2 should have won for its unbelievably realistic graphics and features because Rockstar Games spent 8 years fixing and perfecting them. Lava4eva from Reddit states, "This and the fact that 4 months before the release, God of War was almost unplayable. I think Cory and the team deserve the win because they didn't play safe." But (in my opinion) the story of Red Dead Redemption 2 was really slow and kind of boring in some parts. God of War, on the other hand, was great all around.

In conclusion, the 2018's Game of the Year was full of popular games. In addition to its final two games competing, the fact that it had an indie game, Celeste by Matt Make Games, had me and other gamers impressed with its diversity of games. All games competing had great ratings and were respected. I hope Game of the Year 2019 is as interesting as 2018's Game of the Year was.

Tablet vs. Phone

Richard Cruz

Tablet and phones are both one of today’s most known use of technology for different reasons. Like education, good for playing games on your free time or to even keep in contact with different people. But one of the questions that people want to know is WHICH ONE IS BETTER?! Now we will find out. (Keep in mind some of this can be opinion based).

Weight and Size: According to ict-pulse.com, the average tablet weighs about 1.75 pounds but the average phone weighs about 0.25 pounds. In size according to abcnews.go.com an average tablet goes from 5.3 to 10.1 inches long in length and width. But for phones the average length this year is 5.3 to 5.6 inches long and in width is about 2.6 inches wide. So according to size and weight phones are better for taking on the go and carrying.

Entertainment: Entertainment is a big part of technology. First think about how small phones can be. A phone is about an average number of 4 to 6 inches big. But then think about a tablet that has a huge screen for watching movies and playing games. A tablet's average screen size is 6 to 8 inches big. In my opinion I would much rather play a video game on a tablet than a phone and I would definitely watch more movies on a tablet than a phone. According to thedroidguy.com they came up with 4 different tablets that have better graphics than a phone. The tablets are Apple iPad Pro, Samsung Galaxy Tab S4, NVIDIA SHIELD, and Fire HD. Since how wide a tablet is and how good the graphics can be I think tablets won this round. I can't even see any of the subtitles on a TV show on my phone.

Education: As the generations go down the trail technology has been upgrading for education. This is probably the most important topic, EDUCATION! According to theloqitur.com they say “tablets help students learn more material faster. 81 percent of K-12 teachers believe that tablets enrich classroom education. Tablets also help to improve student achievements on standardized tests. They help students better prepare for a world immersed in technology”. But if you look at oxfordlearning.com it says “Cell phones give students access to tools and apps that can help them complete and stay

in their class work. These tools can also teach students to develop habits, like time management and organization skills.” But let’s

look at the other side of using tablets and phones in school. First tablets and phones both add to more screen time in your day that at points can be bad for your eyesight. Next phones and tablets can become distracting sometimes. Lastly tablets and phones are both very expensive compared to textbooks. So for education there is ups and downs for phones and tablets. I think these two belong in this category.

for

Tablet vs. Phone

Richard Cruz

Who won?

When it comes to phones VS tablets its more opinion based then informational and for this topic you can't really rely on facts. So there is only one way to settle this BEEF BETWEEN THE PHONE USERS AND THE TABLET USERS! I will be doing a class vote. Keep in mind the results from this is from class 603 SO DO NOT YELL AT ME! Now we will ask class 603 what is the better technology device, phones and tablets.

The Class Results

Team Tablets

Team Phone

Amount of votes for tablets

Amount of votes for phone

-10

-16

Looks like phones overpower on this debate. Remember this is class 603s vote so if you are a tablet guy blame this on 603. Better luck next time tablet users.

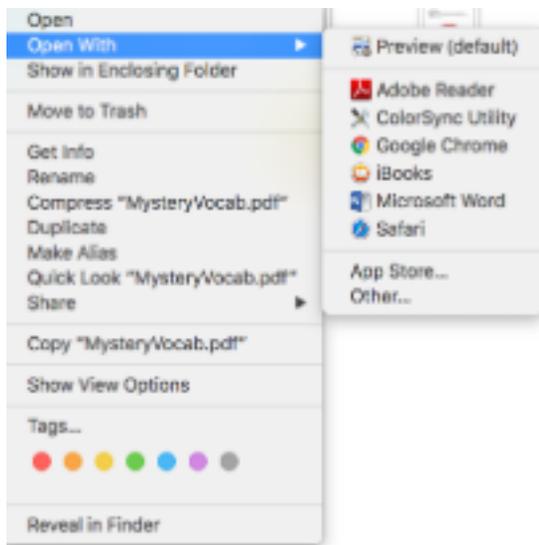

Tips and Tricks for Macs

Benjamin Goihman

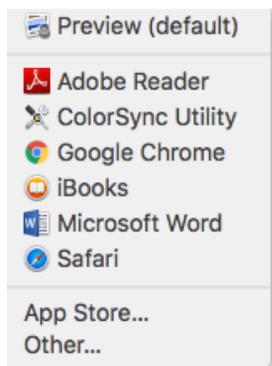

Here are the Best Mac Os Shortcuts and Tricks for Mac.

You get a pdf. How am I supposed to edit it without printing and writing without a pencil? The answer is preview. The steps below will tell you how. ↓

1. Open your pdf FROM YOUR DOWNLOADS NOT FROM THE THING GOOGLE LETS YOU CLICK.

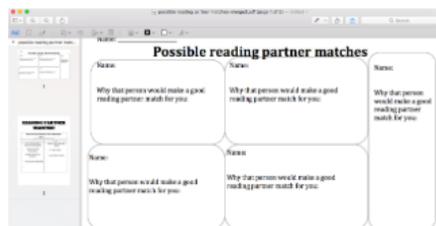

a) If it does not work do this:

b) Click on preview.

2. It should look like this or whatever your pdf is.
3. Click the tool box icon.
4. It should end up like this:

a)

b) Click on the T with the box around it.

6. And you should be able to drag and drop and edit the box
7. Hold ⌘ at the same time as S to save
8. Copy ⌘ and C at the same time.
9. Paste ⌘ and V at the same time.
10. Cut (copy and delete) ⌘ and X at the same time.
11. Do take screenshot hold ⌘ shift and 4 and the same time. Then look at you desktop and it will be there somewhere.
12. For spell check on google docs hold ⌘ options and x at the same time. This will make the spell check box pop up.
13. ⌘ shift and period make the font go up in google docs make font become bigger. ⌘ shift comma makes the font go smaller in google docs.
14. Hold ⌘ and W and the same time to close a tab.
15. To change tabs if you have less than 9 you can hold ⌘ and whatever tab it is. For example my first tab would be 1 and so on.
16. If you have more than 9 you can do ⌘ shift] to go to one tab to the right and ⌘ shift [to go to one tab to the left

Homework: Too Much or Too Little?

Samari Beauford and Isabel Karaoglu

Homework. Some people stress over it every single night. Some people find homework easy, and do it in a flash. And then some people just don't care. Students view homework in many different ways.

What do you think of homework? Let's find

out what some of the 6th graders in Booker T. Washington think. We asked the following questions:

-Do you regularly get a lot of homework?

-Do you feel like you get too much, too little, or just right amount of homework?

-What subject do you get the most homework?

-What subject do you get the least homework?

DO YOU REGULARLY GET A LOT OF HOMEWORK?

YES	NO
5 people	3 people

DO YOU FEEL LIKE YOU GET TOO MUCH, TOO LITTLE, OR JUST RIGHT?

TOO MUCH	JUST RIGHT	TOO LITTLE
6 people	2 person	0 people

Homework: Too Much or Too Little?

Samari Beauford and Isabel Karaoglu

When we asked this question, majority of the 6th graders only picked three of the following:

WHAT SUBJECT DO YOU GET THE MOST HOMEWORK IN?		
HUMANITIES	MATH	SCIENCE
5 people	3 people	0 people

WHAT SUBJECT DO YOU GET THE LEAST HOMEWORK IN?		
HUMANITIES	MATH	SCIENCE
2 people	1 person	5 people

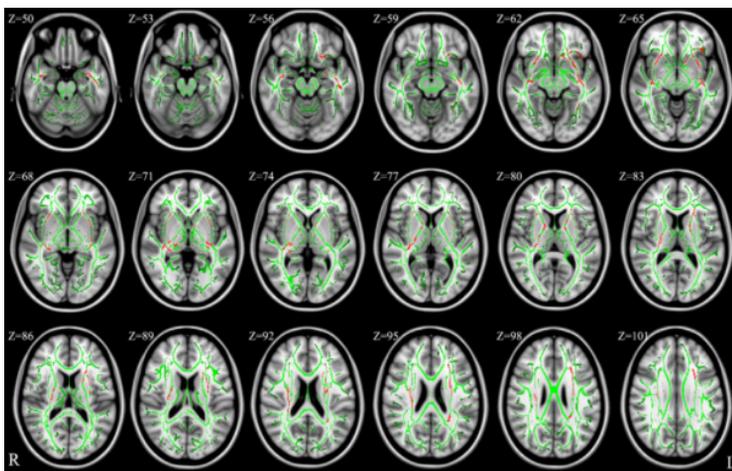

Based on our results, what does this mean? Judging from this data, 75% of the 6th graders we interviewed feel that they get too much homework. We have come to a conclusion that everyone has their own schedule and teachers making everyone’s homework situation different. We also asked why they felt they had too much homework and majority of them said that they receive so much homework, it has them up late at night for hours. So what can we do to prevent this? Decrease the homework? Have teachers schedule a homework due date? What do you think?

MYTHBUSTERS

Stop Playing On Your Phone or It Will Damage Your Brain

Amir Abuzaid

A myth your parents might tell you is to **stop playing on your phone, it will damage your brain.** Is this true though? In a website, “Very Mind Well” it states, **“Recent research suggests that smartphone usage does indeed have an effect on the brain,** although the long-term effects remain to be seen.” People who have phones have a hint of brain damaged based on the tests scientists have done. This scientist did an experiment on people and did do research and said that people can have damage on their brain. But what damage? In the website, “Psychology Today” it states, **“ I observe that many of the children I see suffer from sensory overload, lack of restorative sleep, and a hyper aroused nervous system.”**

This shows that children can get sensory overload from playing on their smartphone for too long. Sensory overload is when, when a person’s body cannot stand the noise and activity from the environment. It causes Lack of sleep because when you have sensory overload, you lose sleep then you have hyper aroused nervous system which was caused by lack of sleep because they were symptoms of lack of sleep. Conditions: sensory overload, lack of restorative sleep, hyper aroused nervous system.

1. Sensory overload is when, when a person’s body cannot stand the noise and activity from the environment. As a result, People can get lack of sleep so they won’t be as active as a normal person will. Therefore, if you play for your phone for too long, you can’t stand the amount of noise you listen to, you won’t get the amount of sleep your supposed to get so then you won’t be as active as usual.
2. Lack of restorative sleep is when you don’t get your daily sleep. This occurs because of sensory overload. Since your brain couldn’t stand the usage of your smartphone, its causes lack of restorative sleep. Based on the article by “The Hits,” it states, Using your phone not only stimulates your brain but the blue light emitted by all LED screens also interferes with the production of the sleep hormone melatonin.” This shows that different parts of the phone can cause this. To summarize, lack of restorative sleep is when you don’t get the same amount of sleep your supposed to get, which is ten hours or more, you will be tired.
3. Hyper aroused nervous system is when you have sleeping problems, difficulties concentrating, irritability anger and angry outbursts, panic, constant anxiety, easily scared or startled, self-destructive behavior.

MYTHBUSTERS

Stop Playing On Your Phone or It Will Damage Your Brain

Amir Abuzaid

Based on all three paragraphs, sensory overload causes all of these symptoms, so you should get the right amount of sleep your supposed to get. This is also caused by sensory overload. This causes lack of sleep, which makes you angry and scared because you didn't get as much sleep as your supposed to.

Risks of Getting Cancer

In addition, the site, "Onlinesence" it states, "Over the past decade, we've had escalating brain cancer rates in the population. Research not only shows that this is highly correlated with wireless gadget use, but also how and why this is happening. There is research that suggests that those who hold phones next to their face or in their pocket for too long tend to have higher rates of cancer." This shows that if you have your phone with you for too long you will have higher rates of brain cancer because of the radiation. People who play with their phone twenty four seven, that might affect your brain.

In conclusion, phones can be really useful at times such as sending emails, sending texts, calling friends and family, but your brain can be really sensitive about using your phone all the time; you can resolve this by having limited screen time.

MYTHBUSTERS

Does keeping your eyes close to the TV make you go blind?

Nirvan Mulchandani

It's a common saying that keeping your eyes too close to the TV can cause you to go blind. In this episode of the Mythbusters, we will dive into this topic and find out the truth. Is keeping your eyes close to the TV make you go blind?

The truth is, it is completely false. Adults think that concentrating on something so close to the face can cause eyestrain and blindness. But according the American Academy of Ophthalmology, "Children can focus at close distance without eye strain better than adults." Watching TV too close to the screen is as bad as reading a book or using your phone .

But watching TV too close to the screen does have its downsides. It can cause eyestrain and headaches. Additionally, watching too much TV isn't productive or helpful most of the time.

In conclusion, keeping your eyes close to the TV won't make you go blind, but it does have its consequences. Follow up on more of the Mythbusters to learn about what other myths you thought were true but were just myths.

MYTHBUSTERS

Do bulls hate red?

Cyrus Smith

Have you ever heard that bulls hate the color red, and that is why bulls chase the mutelas (stick with red cloth hanging from it) held by bullfighters, right? Well, wrong. Bulls are colorblind, and what they chase is the movement of the bullfighters. So all those movies/books you've seen/read are lies.

MYTHBUSTERS

Macs Cannot Get A Virus

Gabe Brazil

Some people think that Macs can not get a virus. That is completely false. There two major reasons one that is not possible and absurd. Second it used to be closer to true but not anymore.

The reason it is absurd is that Mac OS is very popular. This means hackers would not leave it alone.

The reason it used to be true is when Mac OS had so little market share. At this point hackers were only making Windows-based virus so they can attack more. However now it is not the case.

This is why a Mac can get a virus.

Day In The Life Of A Middle Schooler

Nirvan Mulchandani

(Warning, this article might not be your exact schedule or life because we have different classes and different life)

7:00 AM	Alarm clock goes off
7:05 AM	Actually wake up
7:10 AM	Get ready for school
7:20 AM	Finish eating breakfast
7:30 AM	Leave for school
7:31 AM	Hope I won't be late for school
8:10 AM	Reach school
8:11 AM	Get to Early Academy late
8:40 AM	Go to homeroom
9:00 AM	Go to first period
9:03 AM	Explain why the homework isn't done
9:51 AM	First period ends
9:52 AM	Mind blanks
11:31 AM	Mind stops blanking

Day In The Life Of A Middle Schooler
Nirvan Mulchandani

11:32 AM	Realize it's almost lunch
11:33 AM	Lunch starts
11:38 AM	Get in line for lunch
11:45 AM	Get lunch
12:00 PM	Go to recess
12:25 PM	Recess ends
2:05 PM	Stop thinking about recess
2:06 PM	Go to last period
2:07 PM	Start a test
2:08 PM	Realize failing is a possibility
2:58 PM	Class ends
2:59 PM	Finish test
3:02 PM	Leave school
3:05 PM	Spend life savings on snacks
3:15 PM	Get on bus/train
3:40 PM	Get home

Day In The Life Of A Middle Schooler

Nirvan Mulchandani

4:00 PM	Start homework
5:45 PM	Finish homework
6:00 PM	Relax
6:45 PM	Stop relaxing
7:00 PM	Eat dinner
7:15 PM	Finish dinner
7:20 PM	Relax again
7:40 PM	More relaxing
8:00 PM	Take a shower
8:10 PM	Brush the precious white pearls (teeth)
8:20 PM	Mess around on the phone
9:00 PM	Get in bed
9:30 PM	Fall asleep
7:00 AM	Alarm clock goes off
7:01 AM	Déjà vu

Google Tricks

Cyrus Smith

As you all know, Google is a place of almost infinite information, and is perhaps one of the most famous things on the internet. But, like most other famous things, there will be secrets in it... here are a few!

- Search, “Do a barrel roll” (Outdated, might not work. Worth a shot though! :p)
 - Search, “Atari breakout”, then go to images!
 - Search, “Google space.”
 - Search, “Timer”.
 - Search, “Google gravity”.
 - Search, “Google underwater”, and click first result.
 - Search, “Askew”.
 - Search, “Google Pacman”.
 - Search, “Google Sphere”, and click the first result.
 - Search, “Zerg Rush”, and see what happens.
 - Search, “Flip a Coin”.
 - Search, “Random Number Generator”
- Search, “Recursion”. Try and fix the spelling mistake :P (Don’t do this if you have OCD)

Did you mean: *recursion*

That’s all! Which was your favorite?

Climate Change

Cyrus Smith and Ben Gohman

Many scientific findings, reports, and classroom projects depict the horrible effects of unnatural or extreme climate change/global warming, or heat being trapped in a greenhouse-like layer of the atmosphere could have on our world. However, some doubt whether it is really our fault, or if it even exists at all.

Is it even real?

Although NASA and many other scientists back the research that suggests climate change is real, many people, including politicians with high power and even the U.S. President himself, claim that climate change is all but a hoax meant to stir panic. However, not much reasoning is presented by “deniers” except the argument that NASA and all the other scientists backing climate change could just be doing this for money, which is, again unproven. However, scientists backing climate change have years of research worth of evidence supporting their claim. Based on this lack of evidence of deniers, the rest of this article will make the assumption that climate change is real, and is affecting our planet.

Is it caused by us?

Before you can understand if humans are causing unnatural climate change, you have to understand what it is. As briefly described earlier, “climate change” (as it is discussed in this article, a very popular political subject right now, what the “Green New Deal” is trying to solve, etc.) is heat from the sun entering the atmosphere, and then being trapped by “The Greenhouse Layer”. The greenhouse layer is made up of certain “greenhouse gases” including carbon dioxide, methane, nitrous oxide, ozone, and many other gases. This is where we humans come in. You see, we make electricity by burning fossil fuels. This emits greenhouse gases, including carbon dioxide. In addition, driving cars emits carbon dioxide, nitrous oxide, and methane. Following this pattern, many things we do or use emit greenhouse gases. This chart from the EPA website greenhouse gases, so on and so forth. If we keep going with this, eventually we will be out of fossil fuels AND getting. Which is why we need to stop. Unless... climate change is not our fault. According to Australian scientist Jennifer Marohasy and Dr. Abbott this extreme climate change we have been experiencing recently is natural, and they do have evidence. They say that global temperatures would be the same without the extra CO₂. However, the climate change we have been experiencing has been much worse than anything else because of excess CO₂. And this is the first period of climate change with human technology in existence. So, climate change appears to exist and seems to be made by humans.

Attack on Titan

Sam Zwick-Lavinsky

Attack on Titan, by Hajime Isayama (Some people call it Shingeki no Kyojinis), one of the top thirty leading animes, but you may not have heard of it. Right now, it's number two on the list, right after Naruto, but it's definitely worth reading (or watching).

One reason for reading Attack on Titan is the storyline. It's a very creative storyline, based around huge monstrous creatures that resemble humans, known as Titans. In the early days of humanity, Titans appeared. No one knows where they came from or why they are here, but it seems all they want to do is eat humans—although they don't have to eat to survive. Humans decided to build walls—three walls, to be specific, Wall Sheena, Wall Rose, and Wall Maria. Towns are built jutting out of the walls, as shown in figure a.

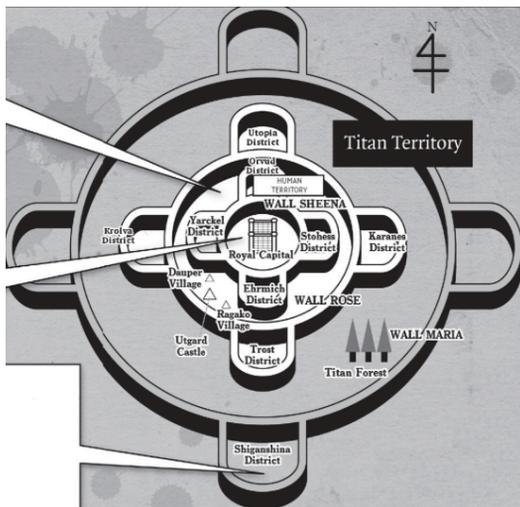

Figure A

The story follows a young boy named Eren Yeager, who desperately wants to fight against the titans to save his people; he joins the survey corps, an elite group of people serving for humanity by killing titans. But one day the mighty colossus titan—an abnormal titan—appears, sparking a rare chain of events.

Another amazing feature of Attack on Titan is the art. Created by Hajime Isayama, the art is beautiful, showing creative style in manga, diverting from stereotypical anime and Japanese figures.

Attack on Titan

Sam Zwick-Lavinsky

Most people recognize the creators of anime as Jun'ichi Kōuchi and Seitaro Kitayama. The earliest identifiable anime films date back to 1917, starting as mostly propaganda, but many anime feature films were released later during World War II.

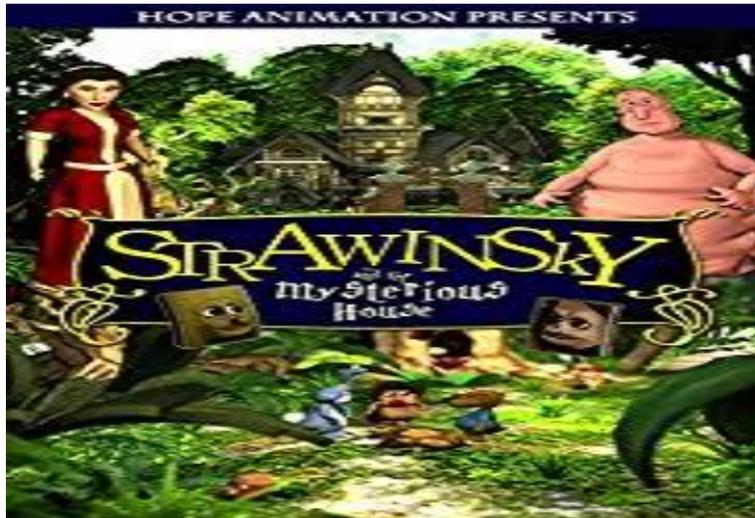

HAJIME ISAYAMA, CREATOR

Attack on Titan is an amazing series. Despite all the blood and gore (and there is a lot of it), the art and plot line is complex and intricate.

Strawinsky and the Mysterious House (A Comedy/Movie Review)

Cyrus Smith

Stravinsky and the Mysterious House is a movie (Isn't that obvious?) that was released in 2012 by Hope Animations. However, it isn't exactly an exemplary movie.

[Strawinsky and the Mysterious House \(2012\) - IMDb](https://www.imdb.com/title/tt8141808/)

<https://www.imdb.com/title/tt8141808/>

★☆☆☆☆ Rating: 3.5/10 - 203 votes

There are several reasons for this rating, and today this article will be listing the good and the bad of this movie. (Just warning you, it's mostly bad.)

(Obviously a wonderful movie, according to critics on Google)

Animation

As you can see by the cover, this movie is not exactly well animated. However, it's not quite as bad in the movie.

Sure, most of them are crisp, but it lacks detail. To quote David Hutter, the man who created Strawinsky and Hope Animations, "No qualifications, experience or budget - let's do it!" This was a VERY risky thing to pull off – and it shows in the quality of the animation, as it looks like it just came out of a 3d printing website.

Strawinsky and the Mysterious House (A Comedy/Movie Review)

Cyrus Smith

Plot

SPOILER ALERT! (Do you even care though?)

The movie starts with some classic exposition, introducing Strawinsky and his friends, and then the characters stumble upon a troll who needs to pay someone called the Scarlet Queen for a debt he never owed. Then, Strawinsky walks around the house to find a cello moping about his sadness after stating that he was betrayed by the Scarlet Queen, and a weird dough monster called the Globgogabgalab, who was cursed by the Scarlet Queen, and he sings an unnamed song whose hard-to-understand lyrics make little sense. Then, he finds his friends lifelessly staring at books. Feeling worried, he somehow gets the idea to summon the Scarlet queen despite everyone telling him the Scarlet Queen was practically a monster. At first, she doesn't come, so he walks around the house looking for her. Eventually, she comes, and then he leads her back to his friends only to find a strange rat named "The Rat King," who is apparently the main villain of this movie despite literally jumping out his window and then disappearing for the rest of the movie. Finally, the Scarlet Queen picks up her living cello by the neck and she flies away, ending this *movie *
