This combines data (by DBN#) from HS performance (spring 2018 tests) and HS directory (2017/2018) excel files downloaded 12/7/18 from DOE website. Then sorts by admission method (audition, SHSAT, all other/multi-factor).

Then sorts all schools by SAT total score, then provides calcs for SHSAT schools and each following bracket of similar total # seats (e.g., approx 15,000 seat groupings = 5% seat increments, to 25%).

Also includes manual entry of Niche website (top 40 NYC from Niche ranked sort of all NYC) & US News/World Report (top 100 in NY state; of these 27 were in NYC; # lists rank in NYC, then NY state). Note: Clinton in Niche only as MS.

The HS directory data was used raw from the DOE excel file which had multiple columns of repeated data.

Average SAT, 3+AP scores, economic needs, demographics, 4-year graduation, student-ranked safety calculated as student-weighted averaged. AP class offerings calculated as AP course types listed per school.
